

Check Reconciliation Utility

Check Reconciliation for MUNIS® Made Easy

Check reconciliation for your bank accounts can be the simplest thing in the world ... with the right tools and the right bank. However, when your bank does not support any of the standard import formats into MUNIS®, you could be forced to reconcile your checks manually. This results in lost productivity for you and additional cost for your school district.

PSST's Check Reconciliation Utility is the answer for your problem. This Utility provides the help you need by reformatting the bank's check file to fit the import format required by MUNIS. After using the Utility, you have the problem of deciding what to do with the time you now save each month...an easy problem to solve.

If you need to clean up your check reconciliation act, call **PSST**. After we solve this problem, tell us about other issues you have in using MUNIS effectively and we can provide solutions for these issues too!
